Dramatically Increase your leads and sales 24/7 On Autopilot

Is Your Video Working To The Max For You?

You may already understand how effective videos can be on your website, or are seriously thinking about having your own unique video made, but are you fully utilising the hidden marketing strategies that can drive previously untapped audiences to your site?

We’re not talking ‘black hat’ tricks certain search engine ‘guru’s use to trick the likes of Google – they ALWAYS back fire. Pay per click campaigns do work to get your site seen, but require so much time and money to manage a good campaign, and I’ve seen cash disappear faster than water down a plug hole.

As a qualified Search Engine Marketer, I’m always looking for viable traffic tactics, and increasing site positions on the engines. When I find a technique that is so effective, immediate and easy, I grasp the opportunity, and ensure all my clients take immediate advantage of the latest innovations.

You see, a video on your website only works if you can get people to your website in the first place. What if you could use that video to expose your site to hundreds if not thousands of new eyeballs hungry for what you offer?

Start Exploiting the Mega Trends of Web 2.0 Marketing

You may have heard the phrase Web 2.0 – changing the way you interact online, and your experience of the web, so now everyone has an opportunity to be seen and heard on line. That’s why blogging, Social Network Sites like MySpace, and Video Hosting Sites like YouTube have exploded in the past 18 months.

In Dec 2006, 33 % of adults had been to video sharing sites. By the end of 2007, that figure had increased to 48%.

Six out of ten broadband users watch or download online video content weekly, and nine out of ten do so monthly (Horowitz Associates Report: ‘Broadband Content and Services 2007’).

Online Video ad spending increased 89% in 2007 to \$775m, but more significantly, this is set to rise by 40% each year, to reach \$4.3bn in 2011 (e-marketer.com)

Now is the time to ride this wave and be streets ahead of your nearest competition.

Traffic to social media sites are doubling every six months, and with over 1920 such sites as we speak, now is the time to get your video in front of this new interactive audience.

What makes the real difference though is that you have provided your presence for people to already like and trust you, so the time they are viewing your website, they are already pre-sold.

How do you think that will effect your leads and sales? Yes, like a turbo charged explosion.
How Do Videos Effect Search Engine Rankings?

Here's where video gets really exciting. Search engines are hungry for fresh content, and new videos are picked up daily to generate outrageous leaps in site position in the organic rankings – the unpaid listings on the left hand side.

It's totally feasible to get page one rankings – within 24 hours! What could that do for your site visibility? Even if your site was on say, page 3 – it has to increase your visitor numbers. Even for brand new websites, videos ensure Google index your site immediately – something that could take days or even weeks otherwise.

In addition, you'll be listed in the video services search rankings immediately. That means 11percent of surfers who trust video above all else, see you straight away. Every time you post a video to a hosting service, you potentially create a unique high quality one way link back to your site.

You would be right to question anyone that promises a page one position. However, by simply uploading a video gets you natural rankings almost immediately. All you need to do is carefully pick your keywords or phrases that your target market is searching for, and high organic rankings are there for your taking.

Perhaps you are a little sceptical that such amazing results can occur within hours.

Here's a #7 ranking… achieved in just 24 hours from the keyword phrase “Internet Video Marketing.” (from the Internet Infomercial Guru, Mike Koenigs).

And to top it off, he scored an amazing Nine of the top 10 results in mere days with a quick video on the keyword “Internet Infomercials.”

The best traffic is FREE traffic!

And that's exactly what you get when your website sky rockets up the rankings, and new visitors from social

media sites pour to your site, eager to take the massive action you desire.

We've shared with you the Insider Secrets to Virally Marketing your Video. You're one of the elite few who are privy to this powerful information. Now it's your choice whether you want to take advantage of the free traffic waiting for you.

But wait... Isn't There Always A Drawback??

Something has to give. It's not cost that's the prohibiting factor, as signing up for a social media account or a video hosting site is free. However, the time it takes to upload your video to say, 30 video hosting sites, could take you up to 15 hours per submission. It can be a very laborious job.

I'm sure you have better things to do with your time. You could hire someone to upload for you, but then you are back to cost.

Introducing...
Videos Go Viral

We understand the power of Online Videos, and have seen time and time again the effect in rankings and traffic.

Videos Go Viral Outrageous GUARANTEE

You RISK absolutely nothing by saying YES to having your Videos Go Viral right now. As an Professional Search Engine Marketer, I know how to drive new traffic to your website and increase your search engine rankings EVERY TIME using above board tactics and taking advantage of Web 2.0 technology.

In fact, if Videos Go Viral do not dramatically increase your ranking position, I personally guarantee to continue to virally market your video and use leading edge search engine strategies until you see proven results. If after 60 days, you still see no difference in your search engine rankings and traffic, I will refund your money in full

Okay, so now you're probably wondering about the price... you've seen the value, and maybe you're thinking you won't be able to afford this.

Well hold that thought... I've got some good news about that shortly.

But first, how much would you expect for this proven system? If you had a two minute video, and it took, say 20 minutes to upload to a video hosting site, and you did that 30 times, 3 times over for different formats, then repeated the whole exercise 30 days later, that adds up to a whopping 60 hours!

Even if you paid someone to do that at a measly \$15 an hour, that's \$900! And what about the cost of paying an SEO Expert to fully analyse and implement those keywords and phrases to make your posting even more effective? What about a copywriter who specialises in creating powerful titles and descriptions to capture the attention of your hungry audience and drive them to massive action? I have charged \$497 for that service alone.

All of this in addition to having the technical expertise of converting a video into different formats and compressing the file for minimum load times and buffering.

But this is a new service we are offering, usually reserved only for my premium web development clients... so I'm testing prices. And I thought to start with, I'd keep the price way down. So I decided for a two minute Videos Go Viral Package would be NZ\$497. That's fair in anyone's language.

And just think, within days, maybe hours, you can watch as your Alexa rankings jump up in leaps and bounds (Alexa measures the position of your website in the global arena).

However, I'm keen to get even more proven results under my belt, so for a limited time only, I'll slash an additional \$100 of the price! So all you invest is just NZ\$397 for virally marketing your video.

That will get you two sets of postings, 30 days apart. If you like your results and want to ensure regularity of rising rankings, we can resubmit your videos each and every month for a measly \$147! How's that when you compare to what you would normally spend on your pay per click campaign each and every month!

Okay, let's recap and summarise your Videos Go Viral Package...

What you get with

Videos Go Viral

No Risk Special Offer

"YES JO! I Can't Wait To Sky Rocket My Search Engine Rankings have get my Videos Working For Me 24/7 on Autopilot, honing in on my target market driving massive action
